Yadev Jayachandran

Senior Software Engineer @ Tricog Health · Full-Stack · Product
Thinker · ex-Founding Engineer · Building at the intersection of code
& design

Bengaluru, Karnataka, India

Summary

Technologist | Designer | Educator | Product Innovator

I specialize in building scalable, user-centered technology solutions. My work spans multi-tenant web applications, IoT prototyping, and product development, combining technology and design to create intuitive, impactful experiences.

Technology & Product Development: Expert in Vue.js, React, Node.js, and Express, with experience working on game development (Unity), mobile apps (Android Studio), C#, Python scripting, and IoT platforms (NVIDIA Jetson, Raspberry Pi, Arduino, and MQTT).

UI/UX & Product Design: Passionate about human-centered design, crafting seamless user experiences using Figma and design thinking principles.

Leadership & Mentorship: Led hackathons, developer teams, and innovation projects, fostering collaboration and business growth. Skilled in product strategy, stakeholder communication, and team development.

Educator & Community Builder: Dedicated to teaching and mentoring in UI/UX, product development, programming, and design thinking, empowering individuals and teams to bring ideas to life.

Always exploring, experimenting, and innovating. Let's connect and build something great!

Experience

Tricog Health

Senior Software Engineer

June 2024 - Present (2 years 3 months)

Bengaluru, Karnataka, India

humblx

Founding Engineer

November 2022 - May 2024 (1 year 7 months)

India

- Wire-frame, Design, architect, and built our product's features and functionalities.
- Product road-mapping & creating product development strategies.
- Building data-visualization techniques and data transformation scripts to better present the information for our client business users.
- Building complex dashboards and report generators.
- Building theme engine and UI customization features to enhance the UI.
- Re-build most of the features as stand-alone components to work seamlessly and to improve the re-usability of features across the app.
- Worked on optimizing and stabilizing of our existing products.
- Performing UX research to ensure that the product is built with the best user experience for the end user.
- Interacting with clients, understanding their requirements, and planning product development strategies.
- Managing the hiring process, including recruiting, screening, and hiring new talent.

Krews Limited

Full Stack Developer

August 2021 - October 2022 (1 year 3 months)

Abu Dhabi, United Arab Emirates

- Designed and developed a highly customizable multi-tenant web platform, which served as an interface between businesses and their customers.
- Developed the platform from scratch, including UX and UI design, front-end and back-end development, scaling, and everything in between.
- Leveraged my expertise in Vue JS to design and develop numerous custom components that enhanced the platform's functionality and usability.
- Designed and developed various tools to enhance the efficiency of the existing system.
- Delivered a high-quality, scalable multi-tenant web platform that met the needs of both businesses and their customers.

H&R Block Trivandrum

Associate Software Engineer

July 2020 - July 2021 (1 year 1 month)

India

- Worked in the Architect Team at H&R Block, focusing on the R&D of various tools and features for the company's products.
- Handled complex data structures, creating data parsing engines and visualizations of the parsed data, using .Net, C#, Angular, and cytoscape for graph plotting.
- Worked with the product team to enhance features and create scripts to automate code migration.
- Developed a deep understanding of data parsing and visualization, and applied this knowledge to create innovative solutions that improved the user experience.
- Collaborated with team members to ensure the successful delivery of high-quality products that met the needs of both the company and its customers.
- Demonstrated proficiency in .Net, C#, Angular, and cytoscape, as well as a strong ability to work in a fast-paced, collaborative environment.

Kerala Startup Mission

Technology Innovation Fellow - Community Development

December 2018 - April 2020 (1 year 5 months)

As a Technology Innovation Fellow at KSUM, I worked on bringing up the young innovators and improvise their skills using developer communities.

Some notable programs were:

- Idea Fest 2019 - A pitching and Funding platform for student entrepreneurs.
 - 1800+ applied teams
 - 150+ finalists
 - 30+ projects funded & Supported
- Inspire 2019 - A series of events set up across various locations in Kerala, with an aim to give the aspiring minds the entry point to their road to success.
 - 5 regions, 10 campuses
 - 500+ students impacted
 - 10+ teams under mentoring

fullstackengineering.ai

Intern

December 2019 - February 2020 (3 months)

At Fse.ai, I worked with the core team in developing AI courses, training students in programming and designing the brand.

Mozilla

2 years 3 months

Head Of Design, Mozilla Kerala

February 2018 - December 2019 (1 year 11 months)

I worked on designing and handling the design team, which was responsible for delivering all the creatives for the community. During this, I designed the design guide for each event, which helps in standardizing all the designs from posters to T-shirts. Alongside, I contributed to Mozilla OpenDesign and designed for Mozilla Analytics & Research team.

Designer, Mozilla Kerala

October 2017 - December 2019 (2 years 3 months)

Cochin Area, India

Here, I worked on designing posters and other branding assets for the community, including posters and t-shirt designs. Also, I worked closely with the core team, working on coordinating the events in the local region.

PEHIA

Creative Manager

May 2018 - November 2018 (7 months)

Ernakulam, Kerala, India

PEHIA is a non-profit working towards the cause of spreading technical awareness among gender minorities with a special focus on bringing more into programming.

I worked with the team, creating all the designs and creatives from logo to all branding assets.

Google Developers

Developer student clubs Lead

September 2017 - November 2018 (1 year 3 months)

Ernakulam, Kerala, India

Developer Student Clubs (DSC) are community groups for students from any academic background in their undergraduate or graduate term. By joining a DSC, students build their professional and personal network, get access to Google developer resources, and work together to build solutions for local problems in a peer-to-peer learning environment.

Appmaker.xyz

Intern

July 2018 - August 2018 (2 months)

Ernakulam, Kerala, India

Here, I interned as a UI/UX & web developer. Appmaker.xyz is a great startup based out of Kerala, working on providing amazing solutions to businesses. Interning there helped me learn a lot about how things work inside the startup.

HumbleShit

Prototype Engineering intern

June 2017 - November 2017 (6 months)

CUSAT

Being an early-stage startup, I worked with the team to build the prototype of the initial version of the product, iterating, learning, and understanding to optimize the UX of the product.

gooseBerry Media

Intern

June 2017 - June 2017 (1 month)

Education

Toc H Institute of Science & Technology

Bachelor of Technology (BTech), Computer Science · (2016 - 2020)
